EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Karl Bozicevic on 9/12/2006.

The application has been amended as follows: **See the faxed attachment from Applicant.**

The following is an examiner's statement of reasons for allowance:

The closest prior art are: 1) US Patent application 09/475,674 (hereafter "Colman et al") and 2) US Pat No 5,792,901 (hereafter "Prusiner").

Colman et al disclose a method of inactivating, removing or modifying the PrP locus via gene targeting (see paragraphs 149-151). This reference does not suggest operatively inserting an exogenous DNA sequence into cells with ablated PrP gene or using this cell as a means to produce proteins in order to gain a prion-free therapeutic solution. Further, this reference does not provide any suggestion or motivation to try the invention of the instant application.

Prusiner discloses a transgenic mouse wherein both alleles of an endogenous PrP gene are ablated. This reference do not provide any suggestion or motivation to try

the invention of the instant application, including making a prion-free solution followed by inserting an exogenous gene into a somatic cell that expresses proteins for therapeutic use.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michelle Horning whose telephone number is 571-272-9036. The examiner can normally be reached on Monday-Friday 8:00-5:00 EST.
